

- Pick up solid waste and dispose. Use a leaf blower, broom, or plastic rake to remove debris (Leaves, sticks, etc)
- Clean up any spills, other than urine as they occur or found. Blot up spill with towels. Rinse area with water, use a mild cleaner or disinfectant, and flush with clean water.
- Depending on use, rinse or flush the entire Pup-Grass area with water using a hose or sprinkler system.
- Use an enzyme cleaner like Pup-Zymes™ will provide additional odor control if needed.
- Do not use Harsh Chemicals and solvents may compromise the fibers. Only use Enzyme Cleaners
- Broom regularly with a medium bristle broom to revitalize the fiber and keep the infill level, if applicable). Apply infill, if necessary, with drop spreader and broom to level.
- Pup-Grass does not require infill to support the blades however, we recommend our Pup-Fresh Zeolite Odor Controlling infill to keep the grass cooler in the summertime and to control odors especially if you are operating kennels and dog runs. Our infill product is a completely natural granular material.
