

Odor Control Solutions

Pup-Lawn® Patio Kit™

Available at <https://Pup-Grass.com>

Pup-Zymes™

Stain and Odor Control

Highly concentrated enzyme cleaner.
12-1 ratio. Professional Strength "12 to 1" Concentrate.
For Removal of Odor Caused by Dog Urine, Cat Urine, and Skunks.

- Liquid Concentrate
- Can be diluted with water up to 12-to-1
- Deodorizer

- Removes odor instantly, even skunk odor.
- Removes stains from carpet and flooring.
- Bacterial/enzyme Action
- Attacks organic particles that cause odors and stains.
- Environmentally Safe for people, pets, and plants-
- Safe to use around

Pup-Fresh™

All Natural Odor Control Granules.

Pup-Fresh™ is made from a natural mineral that has a structure similar to a honeycomb that allows for a process of water evaporation to occur. This process helps keep artificial turf fibers cool in direct sunlight.

In addition to odor control, Pup-Fresh™ infill supports the individual grass blades, keeping it looking natural and not matted even in high traffic areas. Pup-Fresh is half the weight of silica sand and rubber and completely safe for pets and humans.

- 1 Frame
- 2 Pup-Drain™
- 3 Pup-Grass®
- 4 Cable Ties To Square Frame

Note: The frame must be kept square.

You can nail, or glue the frame or use the cable ties to square the frame. Use the pre-punched holes, and thread the cable ties through the holes and tighten cable ties until the frame is squared .

Care and Maintenance

It is not necessary to remove components from the frame to clean. Remove solid waste from Pup-Grass®. Use a hose, watering can or bucket to flush Pup-Grass®. If needed use an enzyme cleaner occasionally to remove odor.

Step 1.

Layout edging and insert corner connector inside the edging frame and push ends together to connect mitered sections. For 3 x 10 and bigger kits, connect long sections by slipping connector piece into the end of each section and push together.

Step 2.

Mark area making sure corners are square. Use concrete nails or caulk to secure frame to patio. Space approximately nails 3' apart. After you have squared and secured frame, place Pup-Drain as shown with dimples up to edge of nail tabs.

Note: Pup-Drain is cut approximately 6" Shorter than the Pup-Grass

Step 3.

Place Pup-Grass over Pup-Drain.

Using a flat putty type knife at least 4 "wide, tuck Pup-Grass into edging lip. Once frame, Pup-Grass and Pup-Drain are secure, use a broom to brush grass blades.

Kit Contents

- Edging
- Corner Connectors
- Screws
- Cable Ties
- Pup-Drain™
- Pup-Grass®
- Double Sided Tape
