Artificial Grass Built For Dogs

Pup-Grass® is designed with a unique woven backing that provides instant drainage of liquid waste over the entire surface area.

The industry standard backing for artificial grass is a heavy rubberized urethane coating. Holes are placed every 6". This system requires a large volume of water for the drainage holes to become effective. The result is urine becomes trapped between the blades and backing. This creates an environment that allows bacterial growth and unpleasant odors

Industry Standard

Pup-Grass® Instant Drainage

The Coolest Artificial Turf Available

unique backing does not trap heat, it allows it to dissipate. Which provides a significantly cooler surface.

Artificial Grass absorbs heat and will become hot in direct sunlight. Pup-Grass® brand artificial dog grass is 30% cooler than other types of synthetic lawns, because our

Pre-Cut Rolls

For smaller projects Pup-Grass® and Pup-Drain™. Both are available in pre-cut rolls. You can lay over soil or concrete. When laying over concrete we recommend Pup-Drain™ to protect the backing from wear. Both come in Handy Pre-Cut Rolls
3' x 5'
3' x 10'
3' x 15'
